

Huy N.

Seattle, WA · hiiamhuy@uw.edu · github.com/hiiamhuy

IT Specialist · Automation & AI

Professional Summary

IT specialist with 10+ years of experience at the University of Washington supporting diverse users, building automation, and deploying AI tooling. Skilled in generative AI, local LLM deployment, ServiceNow, web publishing, and training users across technical skill levels. Proven ability to author documentation, streamline processes, and enable secure, efficient adoption of emerging technologies.

Education

University of Washington, College of Arts & Sciences — B.A., American Ethnic Studies

University of Washington, Information School — B.S., Informatics.

Professional Experience

Senior Computer Specialist — UW-IT User Consulting Support (2019 – Present)

- Managed incidents and restored service operations promptly, minimizing business impact.
- Authored knowledge base and FAQ articles to improve user support and Service Center routing.
- Designed and programmed ServiceNow forms; developed keyboard shortcuts to improve analyst efficiency.
- Trained students and staff on ServiceNow, email, web hosting, account management, and network troubleshooting.
- Led adoption and documentation of AI-assisted workflows for internal processes.

Identity & Access Management Student Lead — UW-IT Service Center (2014 – 2018)

- Approved non-standard account requests and maintained Person Registry for UW affiliates.
- Developed scripts and programs to support batch account creation and daily operations.
- Authored knowledge base articles and trained student consultants on troubleshooting topics including email, web hosting, and account services.

Projects — AI & Automation

OpenWeb UI Call Center Assistant (2024)

- Implemented offline, self-hosted AI platform using Ollama and RAG to provide real-time guidance to call center agents.
- Developed documentation and training materials to facilitate adoption.
- *Outcome:* Reduced call resolution times and improved agent productivity.

Call Center QA — Transcription & Analysis (2025)

- Automated transcription and quality evaluation of call recordings using WhisperX and local LLMs.
- Built batch processing workflow and rubric-based evaluation system.
- *Outcome:* Streamlined QA process, reduced manual review workload, ensured data privacy.

Automated QuickBooks Entry & Receipt OCR Workflow (2025)

- Developed automated workflow using n8n and OCR to extract invoice data and create QuickBooks entries.
- Implemented logic to handle exceptions, duplicates, and incomplete data.
- *Outcome:* Reduced bookkeeping time, improved accuracy, enabled near real-time financial reporting.

Bloom API Chaya — Web-based Storytelling Platform (2017)

- Designed UI wireframes based on user research; rapidly prototyped front-end using React/Redux.
- Developed RESTful API in Go; performed usability testing to optimize user experience.

Chatbot Microservice (2017)

- Developed Go RESTful API and Node/Wit.ai chatbot microservice.
- Deployed web application to Linux server using Docker with authenticated sessions and WebSocket messaging.

Systems & Infrastructure Projects

- **unRAID Server Build** (2020) — NAS, media storage, VMs, Docker containers, VPN, Windows snapshots.
- **Synology Backup for unRAID** (2021) — 3-2-1 backup strategy, offsite cloud sync via Rclone.
- **pfSense Server** (2019) — Firewall/router, VPN, Snort intrusion detection, network monitoring, pfBlocker region-based IP blocking.

Certifications

- ITIL 4 Foundations

Technical Skills

- **Generative AI & LLMs:** Ollama, LM Studio, OpenWeb UI, RAG, WhisperX
- **Automation & Integration:** n8n, OCR, QuickBooks API, workflow automation
- **Web Development:** HTML, CSS, SASS, Node.js, React, Redux, JSX, Bootstrap, jQuery
- **Database:** PostgreSQL, MS SQL Server, MongoDB, Redis, Firebase
- **Programming:** Go, Java, R, TypeScript
- **IT Support & Platforms:** ServiceNow, Pantheon, Windows, Linux, NAS, UW Shared Web Publishing
- **Other Tools:** Git, Docker, OpenVPN/WireGuard
